Roll was called and the meeting was called to order and a quorum was noted at 1:05 p.m.

Agenda Item No. 3 – Approval of Agenda.

MRS. JOHNS MADE A MOTION TO APPROVE THE AGENDA. THE MOTION WAS SECONDED BY DR. COLE. UPON VOTE OF THE GOVERNING BOARD, THE MOTION CARRIED. (MEMBERS VOTING IN FAVOR: ALEXANDER, COLE, CURTIS, JOHNS, MEECE, QUINCEY, AND WILLIAMS.)

Agenda Item No. 4 – Disposition of Petition Requesting an Administrative Hearing Regarding Water Use Permit Number 2-11-00063, Richard Douglas Farm, Gilchrist County. Mr. Quincey presented the staff recommendation that the Governing Board dismiss the petition requesting an administrative hearing regarding Water Use Permit number 2-11-00063, Richard Douglas Farm, Gilchrist County, as shown in the Board materials.

MR. ALEXANDER MADE A MOTION TO DISMISS THE PETITION REQUESTING AN ADMINISTRATIVE HEARING REGARDING WATER USE PERMIT NUMBER 2-11-00063, RICHARD DOUGLAS FARM, GILCHRIST COUNTY, AS SHOWN IN
THE BOARD MATERIALS. THE MOTION WAS SECONDED BY MRS. JOHNS. UPON VOTE OF THE GOVERNING BOARD, THE MOTION CARRIED. (MEMBERS VOTING IN FAVOR: ALEXANDER, COLE, CURTIS, JOHNS, MEECE, QUINCEY, AND WILLIAMS.)

Agenda Item No. 5 – Proposed Settlement Agreement Regarding Water Use Permit Application Number 2-11-00040, Loncala Dairies, Gilchrist County, Administrative Hearing Request. Mr. Quincey presented the staff recommendation that the Governing Board approve the proposed settlement agreement and authorize the withdrawal of Motions for Sanctions, regarding Water Use Permit 2-11-00040, Loncala Dairies, Gilchrist County, as shown in the Board materials.

MR. CURTIS MADE A MOTION TO APPROVE THE PROPOSED SETTLEMENT AGREEMENT AND AUTHORIZE THE WITHDRAWAL OF MOTIONS FOR SANCTIONS, REGARDING WATER USE PERMIT 2-11-00040, LONCALA DAIRIES, GILCHRIST COUNTY. THE MOTION WAS SECONDED BY MR. ALEXANDER. IT WAS NOTED BY MR. REEVES THAT THERE IS ONE PROPOSED SETTLEMENT AGREEMENT REPRESENTING AGENDA ITEMS 5 AND 6 OF THE MARCH 26, 2012 SRWMD GOVERNING BOARD INTERMEDIATE MEETING AGENDA. UPON VOTE OF THE GOVERNING BOARD, THE MOTION CARRIED. (MEMBERS VOTING IN FAVOR: ALEXANDER, COLE, CURTIS, JOHNS, MEECE, QUINCEY, AND WILLIAMS.)

Agenda Item No. 6 – Proposed Settlement Agreement Regarding Water Use Permit Application Number 2-11-00041, Piedmont Dairies, Gilchrist County, Administrative Hearing Request. Mr. Quincey presented the staff recommendation that the Governing Board approve the proposed settlement agreement and authorize the withdrawal of Motions for Sanctions, regarding Water Use Permit 2-11-00041, Piedmont Dairy, Gilchrist County, as shown in the Board materials.

MR. CURTIS MADE A MOTION TO APPROVE THE PROPOSED SETTLEMENT AGREEMENT AND AUTHORIZE THE WITHDRAWAL OF MOTIONS FOR SANCTIONS, REGARDING WATER USE PERMIT 2-11-00041, PIEDMONT DAIRY, GILCHRIST COUNTY, AS SHOWN IN THE BOARD MATERIALS. THE MOTION WAS SECONDED BY MR. ALEXANDER. IT WAS NOTED BY MR. REEVES THAT THERE IS ONE PROPOSED SETTLEMENT AGREEMENT REPRESENTING AGENDA ITEMS 5 AND 6 OF THE MARCH 26, 2012 SRWMD GOVERNING BOARD INTERMEDIATE MEETING AGENDA. UPON VOTE OF THE GOVERNING BOARD, THE MOTION CARRIED. (MEMBERS VOTING IN
FAVOR: ALEXANDER, COLE, CURTIS, JOHNS, MEECE, QUINCEY, AND WILLIAMS.)

Agenda Item No. 7 – Approval of Land Sale without Reservation of Mineral and Petroleum Interests – Withlacoochee Quail Farm. Mr. Quincey presented the staff recommendation that the Governing Board approve the sale of the 65-acre Withlacoochee Quail Farm surplus tract in Madison County to James D. Kauffman without reserving mineral and petroleum interests, as shown in the Board materials.

MR. CURTIS MADE A MOTION TO APPROVE THE SALE OF THE 65-ACRE WITHLACOOCHEE QUAIL FARM SURPLUS TRACT IN MADISON COUNTY TO JAMES D. KAUFFMAN WITHOUT RESERVING MINERAL AND PETROLEUM INTERESTS, AS SHOWN IN THE BOARD MATERIALS. THE MOTION WAS SECONDED BY MR. ALEXANDER. UPON VOTE OF THE GOVERNING BOARD, THE MOTION CARRIED. (MEMBERS VOTING IN FAVOR: ALEXANDER, COLE, CURTIS, JOHNS, MEECE, QUINCEY, AND WILLIAMS.)

Agenda Item No. 8 – Executive Director Selection. This was provided as an informational item to the Governing Board.

The meeting adjourned at 1:44 p.m.

Director of Mission Support

Assistant Executive Director

Executive Director
MEMORANDUM

TO: Governing Board

FROM: Melanie Roberts, Director of Mission Support

DATE: March 21, 2012

RE: Approval of February 2012 Financial Report

RECOMMENDATION

Staff recommends that the Governing Board approve the February 2012 Financial Report and confirm the expenditures of the District.

BACKGROUND

Chapter 373.553(1), F.S., authorizes the delegation of authority by the Governing Board to the Executive Director to disburse District funds, providing certification is made to the Board at the next regular meeting that such disbursement is proper, in order, and within budgetary limits. In compliance with the statutory provisions in Chapter 373, the Governing Board of the Suwannee River Water Management District has directed staff to prepare a Financial Report in the manner presented.

MEMORANDUM

TO: Governing Board

FROM: Melanie Roberts, Director of Mission Support

DATE: March 22, 2012

RECOMMENDATION

Staff recommends approval of Governing Board Directive No. 12-0001 to provide procedures for implementation of a new Education Reimbursement Program for District staff. Staff also requests approval to expend up to $10,500 in reimbursement payments to close out prior Education Reimbursement Program.

BACKGROUND

The District recognizes that knowledge and skill is vital to staff’s performance in achieving the District’s mission. Staff is encouraged to gain knowledge and skill sets in their areas of District responsibility. The District acknowledges that in order to gain this knowledge, there are times when staff need college level training. This is accomplished through an Education Reimbursement Program which is a practice common to all five water management districts and the State of Florida.

The District currently has an Education Reimbursement program. Under the current program:

- There are no limits on annual or lifetime costs.
- Staff are only reimbursed for one-half of their costs at the completion of the college class.
• Staff are required to work one year from the receipt of degree to be compensated for the remaining half of their costs.

Governing Board Directive No. 12-0001 provides guidelines to establish a new program for college based education. The specifics listed in Directive No. 12-0001 are consistent with the practices of the other water management Districts and were developed to meet the requirements of the Governor’s consistency efforts. The Department of Environmental Protection is tasked with review of all points of consistency including the Education Reimbursement Program and will provide comments on all consistency issues by mid summer.

Staff requests approval to:

• Close out the current Education Reimbursement program including the reimbursement of the remaining one-half owed to staff enrolled in the program. This reimbursement is for an amount not-to-exceed $10,500.
• Implement the new Education Reimbursement program as listed in Governing Board Directive No. 12-0001 which provides guidelines that are more consistent with the other water management districts and will prove to be more advantageous to the District.

As always, all District programs are contingent on availability of funding. At any time, the District Governing Board may suspend this directive.
1.0 Reference to Prior Policy
None

2.0 Purpose and Intent
To establish guidelines and procedures for the implementation of a college education reimbursement program for District employees.

3.0 Definitions

a) Associate degree – the equivalent of the first 60 semester hours of college study
b) Education reimbursement – payment in dollars and cents to an employee for expenses incurred for college coursework.
c) Expenses – tuition, fees, lab fees and books.
d) Graduate studies – line of study where a student has received a bachelor’s degree and is seeking a master or doctorate degree.
e) Procedures Manual – set of detailed instructions for staff to follow in performing their tasks, executing their responsibilities, and conducting business for the District.
f) Undergraduate – line of study where a student has not received a bachelor’s degree.
4.0 Elements of Directive

This directive establishes a program encouraging employees in authorized positions to enhance their knowledge, skills and abilities by participating in college level education courses while continuing to support the work of the District. The college level education courses or the resulting degree must be linked to the mission of the District and the employee’s current job or future career with the District.

1. All approvals for participation in the Education Reimbursement program must be approved by the Executive Director prior to enrollment in any college class.
2. The detailed processes, including proper documentation, for staff to follow for implementation and participation in this program will be included in the District’s Procedures Manual.
3. College-level education courses shall be taken at an institution that is accredited by a nationally recognized association.
4. College-level education courses are available to employees upon their first day of employment.
5. All education reimbursement activities will occur on an employee’s own time. They must not interfere with the employee’s normal work.
6. An employee may be reimbursed up to $3,500 per year for college level education expenses.
7. An employee has a lifetime benefit of $35,000 under this program.
8. Reimbursement of tuition hourly rates shall not exceed local Florida public community college and university rates. Tuition hourly rates shall be based on the closest college or university in proximity to District that offers that degree. Until an Associate degree is earned, the highest rate of tuition per the closest local public community college will be used. After an Associate degree is achieved, the highest rate per the closest local public university offering the requested degree will be used.
9. An employee must achieve a grade of “C” or above in undergraduate studies to be eligible for reimbursement.
10. An employee must achieve a grade of “B” or above in graduate studies to be eligible for reimbursement.

11. Reimbursement in full will be made to employee upon submission of proper documentation as detailed in the District’s Procedures Manual and approval by Department Director.

12. This program is contingent on available funding. The Governing Board of the Suwannee River Water Management District may suspend this program at any time.
MEMORANDUM

TO: Governing Board
FROM: Melanie Roberts, Director of Mission Support
DATE: March 22, 2012
RE: Approval of Governing Board Directive No. 12-0002 for Implementation of a Fraud Prevention Process

RECOMMENDATION

Staff recommends approval of Governing Board Directive No. 12-0002 to provide procedures for implementation of a fraud prevention process.

BACKGROUND

The District recognizes that the potential of fraud is always a risk, in the private sector as well as the public sector. In the past, District staff have informally observed and addressed areas as they were identified that could be at risk for fraud. However, the District does not have a formal written policy.

District staff desire to have a set of processes and procedures that will help define what fraud is as well as implementation of measures to aid in preventing possible acts of fraud. Staff anticipate this process being reviewed annually with the District’s auditor and Governing Board.

Governing Board Directive No. 12-0002 will provide guidelines for staff to develop detailed procedures for implementation of a fraud prevention process.
1.0 Reference to Prior Policy

None

2.0 Purpose and Intent

To establish guidelines and procedures for preventing, deterring and detecting fraud.

3.0 Definitions

1. Finance staff – District staff that oversee the financial aspects of the District, namely the District’s accountant and supporting staff.
2. Fraud – wrongful or criminal deception intended to result in financial or personal gain. Under this directive, the District will consider fraudulent actions to include, but not be limited to:
   1. Any dishonest or misleading act.
   2. Misappropriation of funds, supplies or other assets.
   3. Impropriety in the handling or reporting of money or financial transactions.
   4. Disclosing confidential and proprietary information to outside parties.
   5. Providing inappropriate authorizations or forged authorizations.
   6. Misrepresenting unfinished work as being completed.
   7. Altering documentation, providing untruthful statements or withholding information during the investigation of a case or irregularity.
   8. Seeking or accepting anything of material value from contractors, vendors or providers of services or materials to the District.
9. Destruction, removal or inappropriate use of District records, furniture, fixtures and equipment.
10. Any similar or related action.
3. Management: Staff that acts in a supervisory role.

4.0 **Elements of Directive**

**Scope:**
In order to establish a method of identifying and assessing fraud risk and when possible, developing ways to reduce the risk, the District’s Governing Board and staff accept the responsibility of designing and implementing effective systems and procedures for preventing, deterring and detecting fraud. It is the intent of District to promote consistent organizational behavior by providing guidelines and assigning responsibility for assessing fraud risk, developing controls and conducting any necessary investigations.

This directive applies to any irregularity, suspected or real, involving employees, board members, consultants, vendors, providers, contractors, outside agencies and any other parties with a business relationship to District. While irregularities do not prove fraudulent acts have occurred, they are often indicators that policies are not being followed and therefore, all reported irregularities will be investigated. Any investigative activity required will be conducted without regard to the suspected wrongdoer’s length of service, position, title or relationship to District.

**Roles and Responsibilities:**
The District shall include the following entities with roles and responsibilities in implementing a fraud prevention process.

1. Governing Board – Role is mainly that of fraud risk oversight and fraud deterrent. Responsibilities shall include:
   a. Evaluation of management’s identification of fraud risks,
   b. Implementation of prevention measures, and
   c. Review of District’s plan for managing fraud risk.
2. Finance Staff – Role is fraud risk oversight. Responsibilities include:
   a. Assessing District’s efforts to reduce fraud risk.
   b. Reviewing any irregularities and reporting findings of review to management.
   c. Assisting in the evaluation of the effectiveness of internal controls.
3. Independent Auditor – Addresses the oversight role by:
   a. Assessing the fraud risk prevention processes and procedures.
   b. Reporting findings from the review of the fraud risk prevention processes and procedures to District Governing Board and staff.
4. Management – Role is fraud risk assessment and anti-fraud controls implementation. Responsibilities include:
a. Assessing fraud risks within the District.
b. Providing input on the plan to manage fraud risk.
c. Implementing appropriate anti-fraud programs to reduce the identified fraud risks.
d. Evaluating the effectiveness of internal controls.

Fraud Prevention Procedures and Processes:
Fraud prevention procedures and processes shall be developed, maintained, and included in the District’s Procedures manual.

All entities listed under “Roles and Responsibilities” shall review annually (at a minimum) the District’s Fraud Prevention Procedures and Processes. All additions or updates (whether they are a result of this review or because changes are needed prior to the annual review) to these procedures and processes shall be implemented in a timely fashion.

The District’s Fraud Prevention Procedures and Processes shall:

1. **Identify risk areas.**

   Management will meet annually (at a minimum) to identify and assess fraud risks that the District may encounter. Each meeting shall consider: the manner in which we conduct business, the organizations we conduct business with, the services we provide, review of internal controls, review of procedures and processes, the manner in which departments interact with each other, regulation, and technology.

2. **Develop controls for each risk area.**

   For each fraud risk identified, a new or adjusted internal control procedure will be developed with a plan for implementation. The control shall list the risk area, the responsible staff member for oversight of that risk area, and the specific controls that need to be implemented to aid in preventing fraud in this risk area.

3. **Implement controls for each risk area.**

   Any new or adjusted controls shall be implemented as soon as possible. All affected staff shall be given adequate training on the new controls as well as an explanation on the need for the procedure.
4. **Monitor the implementation of controls.**

   Management staff of each risk area shall monitor the progress of control implementation. They are responsible for verifying and documenting that the new controls are being utilized.

5. **Evaluate the effectiveness of controls.**

   Management, Finance staff, and Independent Auditor will all assist in evaluating the effectiveness of internal controls. This review may coincide with the Independent Auditor’s annual financial review. The Independent Auditor shall report his findings to staff and Governing Board.

6. **Provide a method for response to fraud or reported irregularities.**

   Staff shall develop and maintain a method of response to any suspicions of fraud. Suspicions shall be reported to management and management shall ensure that investigation of such suspicion is handled adequately and timely. All investigations shall be documented and kept in the District’s Central Files.
MEMORANDUM

TO: Governing Board

FROM: Terry E. Demott, Senior Land Resource Coordinator

DATE: March 22, 2012

RE: Resolution 2012-06 Authorizing Acceptance of the Donation of the John B. and Marthann Outland Conservation Easement, 5 Acres ±, Jefferson and Madison Counties

RECOMMENDATION

Subject to public comment that may be received, staff recommends approval and authorization to accept donation of a conservation easement on the John B. and Marthann Outland property.

BACKGROUND

In accordance with Florida Statutes, a public hearing is scheduled for April 10, 2012, to take comments on the proposed donation of a conservation easement on approximately five acres in Jefferson and Madison Counties for the continued protection of the Aucilla River and its floodplains. A summary of salient facts regarding the project is attached.

John Outland has approached the District to accept a conservation easement donation on five acres bisected by the Aucilla River. The Outlands’ parcel is adjacent to the Foster property on which the District has an existing conservation easement. The conservation easement language accepted by Mr. Outland mirrors that of Foster except the Outland property will be 100% in the “special natural area.”

With Governing Board approval, staff will contract an environmental audit and 50-year title search. Prior to the Assistant Executive Director accepting the donation, the environmental audit and title search must show no hazards or clouds on the title. A survey may also be conducted either before or after final acceptance.

John Outland 12-001
PARCEL ASSESSMENT SUMMARY

TRACT NAME: Outland Conservation Easement

SELLER:  John B. and Marthann Outland

COUNTY: Jefferson and Madison

ACREAGE: 5 acres ±

RIVER FRONTAGE: 640 feet (0.12 miles)

WATER RESOURCE VALUES:
  Floodplain: 100% (5 acres)
  Surface Water Protection: 99% (5 acres)
  Recharge: N/A
  Springs Protection: N/A

TRACT DESCRIPTION: This tract is predominately populated with bottomland soft hardwoods and has no development.

ACCESS: The property would be accessed through the adjoining Foster conservation easement property.

OUTSTANDING INTERESTS: Seller of the property to Mr. Outland retains a first right of refusal if Mr. Outland desires to sell the property.

MANAGEMENT ALTERNATIVES: Management of this property would be retained by Mr. Outland or any future owners.

SRWMD shall not be held liable for any injury or damage caused by the use of data distributed as a public records request regardless of the use or application. SRWMD does not guarantee the accuracy, or suitability for any use of this data, and no warranty is expressed or implied. In no event will the SRWMD, its staff, or the contributing agencies be liable for any direct, indirect, special, consequential or other damages, including loss of profit, arising from the use of this data, even if the District has been advised of the possibility of such damages. Users of this data should therefore do so at their own risk. For more information, please contact the SRWMD at 1-800-226-1066.

Madison 2010 NC 1FT Imagery.
WHEREAS, the Suwannee River Water Management District (District) has been offered lands owned by John B. and Marthann Outland, consisting of approximately 5 acres in Jefferson and Madison Counties, Florida, a legal description and map of said lands being attached hereto; and

WHEREAS, John B. and Marthann Outland wish to donate a conservation easement on their property to District; and

WHEREAS, the donation is consistent with the five-year plan of acquisition filed with the Legislature and the Florida Department of Environmental Protection (Department) and is consistent with Section 373.199, Florida Statutes (F.S.); and

WHEREAS, said lands serve to protect the Aucilla River and its floodplains; and

WHEREAS, said conservation easement is being donated for water management purposes; and

WHEREAS, the funds hereinafter requested will be used only for the associated costs of said donation, and the costs of said donation shall include fees for survey, appraisal and legal activities necessary for the proper transfer of said conservation easement interests; and

WHEREAS, said conservation easement donation contributes to the achievement of the Florida Forever Act as described in Section 259.105(4)(a)2, F.S.; and

WHEREAS, said lands shall be maintained in an environmentally acceptable manner and, to the extent possible, compatible with surface water protection; and
WHEREAS, said conservation easement donation was approved for donation after duly noticed public hearing thereon; and

WHEREAS, potential claims by the state to sovereignty submerged lands have been considered; and

WHEREAS, said conservation easement is not being donated as right-of-way for canals or pipelines; and

WHEREAS, an environmental audit shall be performed prior to closing, and before the purchase of any land found to be contaminated, a remediation plan will be submitted to the Department; and

WHEREAS, funds are available for payment of the associated expenses and fees for said parcel through funds deposited in Florida Forever Trust Fund to the credit of the Suwannee River Water Management District.

NOW, THEREFORE, BE IT RESOLVED by the Governing Board of the Suwannee River Water Management District:

(1) Donation of the described conservation easement on lands owned by John B. and Marthann Outland, their successors or assigns, is approved and accepted by the Suwannee River Water Management District.

(2) The District Governing Board authorizes its Executive Director to execute any necessary documents as directed by Governing Board’s legal counsel to complete this real estate transaction.

(3) The above statements are hereby certified and declared to be true and correct, and the acquisition of said parcel is hereby further certified to be consistent with this District's plan of acquisition and Section 373.199, F.S.

(4) District hereby requests the Secretary of the Department of Environmental Protection approve the release of funds from the Florida Forever Trust Fund for associated closing costs pending documentation of actual District's direct costs at a time subsequently requested and documented by District to Department.
PASSED AND ADOPTED THIS 10th DAY OF APRIL, 2012, A.D.

MEMORANDUM

TO: Governing Board
FROM: Terry Demott, Senior Land Resource Coordinator
DATE: March 22, 2012
RE: Detailed Assessment of the George and Sharon Nyman/Suwannee River Oaks Parcel in Gilchrist County

RECOMMENDATION

Staff recommends the Governing Board authorize staff to conduct a detailed assessment for a perpetual conservation easement of the 311-acre ± Suwannee River Oaks Tract in Gilchrist County owned by George and Sharon Nyman.

BACKGROUND

George and Sharon Nyman purchased their Suwannee River Oaks property in 1984, and since 1996 they have discussed a sale to the District. The Nymans offered a conservation easement to the District in October 2010 for $2,750 per acre, and their property was approved by the Board for detailed assessment and appraised. In June 2011 work on this parcel was suspended along with all other Florida Forever projects.

The property is being reoffered at $1,768 per acre in order to be reconsidered by the Governing Board. The tract would add to protected adjoining water resource lands at Otter Springs.

With Governing Board approval, staff will refine details of a conservation easement with the landowner, review the title and procure appraisals. Pending outside independent appraisal review and valuation, a recommendation towards a conservation easement purchase would be provided to Board members prior to any offer being made to the landowner.

attachments
PARCEL ASSESSMENT SUMMARY

TRACT: Suwannee River Oaks
SELLERS: George and Sharon Nyman
COUNTY: Gilchrist
ACREAGE: 311 acres +/-
RIVER FRONTAGE: 5,671 feet (1.07 miles)
WATER RESOURCE VALUES:
  Recharge: 0.7% (0 acres)
  Springs Protection: .7% (2.2 acres)
  Surfacewater Protection: 55% (171 acres)
  Floodplain Protection: 100% (311 acres)

TRACT DESCRIPTION: Suwannee River Oaks is a 1984 platted unrecorded subdivision with 29 lots sized from 10 to 12 acres. The tract adjoins the north boundary of SRWMD’s Otter Springs property and supports a high quality stand of floodplain cypress and hardwood forest on 260 acres bordering the Suwannee River. The remaining 51 acres is in mature mixed pine hardwood forest.

ACCESS: The property is reached by private easement from SW 80th Ave, a county graded road.

OUTSTANDING INTERESTS: There is a ¼ oil, gas and mineral interest from 1949 to Delta Gulf Drilling over 142 acres. Lot 18 is the southernmost 10-acre lot in Suwannee River Oaks and was sold in 1984. The Nyman’s have an agreement to purchase Lot 18 as a condition of a conservation easement to the District.

MANAGEMENT ALTERNATIVES: A conservation easement is proposed over the entire acreage to protect floodplain and wetland resources with no wetland or floodplain forest harvesting or conversion over 260 acres. The landowner has proposed construction of four residence/lodges on four lots and the continued use of an existing grassed air strip as the only future development.

CURRENT ASKING PRICE: $1,768 per acre or $550,000 for a perpetual conservation easement or fair market value as determined by independent appraisal.
NOTE: This map was created by the Suwannee River Water Management District (SRWMD), Real Estate Program (REP), and the Department of Mission Support (DMS), to be used for planning purposes only. MEMORANDUM

TO: Governing Board
FROM: Terry E. Demott, Senior Land Resource Coordinator
DATE: March 22, 2012
RE: Detailed Assessment of the J.T. Bridges/Azure Properties, LLC Property in Hamilton County

RECOMMENDATION

Staff recommends the Governing Board authorize staff to commence detailed assessment and negotiations for the fee purchase of the 220-acre ± J.T. Bridges/Azure Properties, LLC Parcel on the Suwannee River in Hamilton County.

BACKGROUND

Through attorney Michael Minton, J.T. Bridges/Azure Properties, LLC has offered the District a 220-acre parcel of property adjacent to the Suwannee River. This parcel adjoins the District’s McAlpin Landing Tract and is across the river from the Little Creek Tract.

Although this property is not identified as a project area in the 2012 Florida Forever Work Plan, District staff reviewed the offer and agree it would be an excellent addition to District ownership of Suwannee River floodplain. The property would fulfill two of the District’s core missions: flood control and natural resource protection.

Pending Governing Board approval, staff will research the title and procure appraisals to determine the property’s fair market value. Pending independent appraisal review, market value recommendations would be provided to Board members prior to entering into an agreement for purchase.

PARCEL ASSESSMENT SUMMARY

TRACT: Bridges

SELLER: J. T. Bridges/Azure Properties, LLC
Owner’s Representative: Michael Minton, Attorney at Law

COUNTY: Hamilton

ACREAGE: 220 acres ±

RIVER FRONTAGE: 1.2 miles ±

WATER RESOURCE VALUES:
- Surface Water Protection: 34% (74 acres)
- Recharge: N/A
- Springs Protection: N/A
- Floodplain Protection: 73% (160 acres)

TRACT DESCRIPTION: The tract includes about 156 acres of bottomland soft hardwoods and scattered pine. Approximately 20 acres of the tract contain a 9-year old slash pine plantation, and there are another 44 acres of slash pine that were planted in the winter of 1967-1968.

ACCESS: The property is adjacent to Hamilton County SE 194th Lane and is also accessed from SE 191st Avenue through another piece of the Bridges Tract.

OWNER’S ASKING PRICE: $3,000/acre

OUTSTANDING INTERESTS: All timber is in a lease to Packaging Corporation of America. The property is currently under a hunting lease.

MANAGEMENT ALTERNATIVES: The area could be managed as a low intensity general recreation tract to allow passive uses (hiking, biking and nature study) while preserving floodplain forests and wetland resources in their natural state. The hunting lease may also be an alternative for additional recreation opportunities and revenue.

MEMORANDUM

TO: Governing Board

FROM: Melanie Roberts, Director of Mission Support

DATE: March 19, 2012

RE: Activity Report, Department of Mission Support

DATA MANAGEMENT:

- Staff continues to provide support to staff, other agencies, and the public through GIS requests, database needs, and records requests.
- A GIS work order was signed will be completed in a few days. The work order provided for a contractor to process the data for Land Management’s Excellance in Land Management Report. Also included was the completion of GIS layer with features associated with conservation easements purchased by the District. This will be useful for staff to do preliminary evaluations of the conversation easements using this layer and the most current imagery.

INFORMATION TECHNOLOGY AND COMMUNICATIONS:

- IT staff continues to provide support to staff, other agencies and the public through ongoing resolution of Help Desk tickets, scheduled system backups, and programming and database development and maintenance. New PC rollouts are nearly 50% completed. Anticipated date for completion is July 1.
- Communications staff continue to support the District’s mission through timely website updates, press releases, water conservation outreach, and springs protection coordination.

ADMINISTRATION:

- Staff has been working with external auditors to finish fiscal year end September 30, 2011 Audit Report in preparation for presentation to the Board for acceptance in April.
- Staff met with Program Leaders to kick-off the Fiscal Year 2013 budget development process.
- Staff continues to work with legal counsel on the development of contracts and other agreements.
MEMORANDUM

TO: Governing Board

DATE: March 22, 2012
RE: Activity Report, Real Estate

The attached reports summarize the status of surplus activities and conservation easement reviews for the preceding month. Staff is prepared to address any tracts of particular interest the Board may wish to discuss.

Highlighted activities include:

- Sale of the Bay Creek South surplus tract: Completion date - March 16, 2012.
- Sale of the Withlacoochee Quail Farm surplus tract: Completion date - no later than March 30, 2012.
- Review by the Surplus Land Committee of several tracts of property originally acquired to support municipal services. Further reports and possible recommendations will be brought to the Governing Board at a later date.

RE: License to Cut Timber with Harley Forest Products, LLC, for the Black Tract #4 Timber Sale

RECOMMENDATION

Staff recommends the Governing Board authorize the Executive Director to execute a license to cut timber with Harley Forest Products, LLC, for the Black Tract #4 Timber Sale.

BACKGROUND

Bids for the Black Tract #4 Timber Sale were due February 29, 2012. This is a first thinning, second thinning, and improvement thinning timber sale of approximately 162 acres in Madison County. Timber to be harvested is planted slash pine (estimated to have been planted in 1984 and 1986), natural loblolly pine, natural longleaf pine, and natural hardwoods. Seven responses were received. Bidders and calculated revenues from the bid are shown below:

Harley Forest Products, LLC, bid $14.03/ton for topwood, $15.03/ton for pine pulpwood, $18.10/ton for chip-n-saw, $28.06/ton for pine sawtimber, and $3.08/ton for hardwood pulpwood on this per unit sale. Total revenue from this sale should be between $88,260 and $107,874. Using the volume estimates by timber product developed by the Florida Forest Service staff at Twin Rivers State Forest, the anticipated revenue is $98,067.

The principal for Harley Forest Products, LLC, is Allen J. Harley. Their headquarters is located in Lake City, Florida.

RE: License to Cut Timber with Harley Forest Products, LLC, for the Steinhatchee Springs #10 Timber Sale

RECOMMENDATION

Staff recommends the Governing Board authorize the Executive Director to execute a license to cut timber with Harley Forest Products, LLC, for the Steinhatchee Springs #10 Timber Sale.

BACKGROUND

Bids for the Steinhatchee Springs #10 Timber Sale were due March 6, 2012. This timber sale is 109 acres of planted slash pine in Lafayette County, Florida (estimated to have been planted in 1992). Trees to be cut shall include every 5th row with selective thinning of the other rows. Three responses were received, and calculated revenues from the bids are shown below:

FROM: Bob Heeke, Senior Land Resources Manager
DATE: March 22, 2012
RE: Contract with Florida Forest Service, Andrews Nursery for FY 2013 Containerized Longleaf Pine Seedling Production

RECOMMENDATION

Staff recommends the Governing Board authorize the Executive Director to execute a contract with Florida Forest Service, Andrews Nursery for containerized longleaf pine seedlings for a cost not to exceed $80,000.

BACKGROUND

On January 6, 2012, the District released Request for Proposals (RFP) 11/12-015 for pine seedling production and for refrigerated trailer services because of the number of individual sites and the distance between sites. The RFP requested, along with references and previous work history, per thousand seedling costs for containerized longleaf pine and bare root slash pine. The District anticipates needing approximately 490,000 containerized longleaf pine for reforestation of District lands during the FY 2013 planting season. The Selection Committee decided to reject all proposals mainly due to the costs associated with refrigerated trailers.

The District’s Procedures Manual allows services from a state agency to be obtained through a negotiated process initiated by the Executive Director, subject to Governing Board approval, on an individual basis. Staff contacted Andrews Nursery in Chiefland, Florida, which is managed by Florida Forest Service.

Andrews Nursery can provide longleaf pine seedlings from a local seed source in Hamilton County at a competitive rate of $160 per 1,000 seedlings. Delivery costs to the east and west regions is $8.00 per delivery, which is equal to the lowest delivery rate from the three proposals. Andrews Nursery will provide a refrigerated trailer at no charge if their seedlings are stored in it. The savings of using a loaner trailer is estimated to be $4,000.

RE: Contract with The Forestry Company for FY 2012 Mechanical Vegetation Management

RECOMMENDATION

Staff recommends the Governing Board authorize the Executive Director to negotiate and execute a contract with The Forestry Company for an amount not exceed $54,600 for mechanical vegetation management.

BACKGROUND

Request for Proposals (RFP) 11/12-017 for mechanical vegetation management services was released on January 23, 2012. These practices will be conducted to facilitate natural community restoration and prescribed fire on 762 acres. The RFP requested, along with references and previous work history, per acre-rates for roller chopping, scalping planting rows, debris pile removal, and fireline installation on specific sites. A scope of work was provided for the project sites, and proposers had the opportunity to visit each site using maps provided in the RFP.

Seven firms submitted proposals for mechanical vegetation management services. Each project site required roller chopping except Branford Bend which required scalping. Some of the sites required the establishment of firelines and debris pile removal. Below is a table indicating firms submitting proposals and their associated business location based on the response forms.
Members of the Selection Committee composed of Jon Dinges, Brian Kauffman and Terry Demott met and ranked the top three firms for each site. Below is a summary of the #1 ranked firms by project site and the estimated costs based on their proposals.

RE: Chemical Application Services, Non-native, Invasive Weed Control at the Tyree and Lake Rowell Tracts

RECOMMENDATION

Staff recommends the Governing Board authorize the Executive Director to execute a contract with Edko, LLC, for chemical herbicide control of non-native, invasive weeds at the Tyree and Lake Rowell Tracts for an amount not to exceed $14,000.

BACKGROUND

On January 3, 2012, staff released Request for Proposals (RFP) 11/12-013 for chemical application services on District lands. Non-native, invasive weeds have a high potential to disturb the resources and management processes outlined in the District Land Management Plan under the goal of Resource Protection. District land managers take an active role in monitoring and controlling noxious weeds to prevent further spread within District lands and adjacent private and public lands.

Both the Lake Rowell and Tyree projects are considered under maintenance control. Funding to initially control and maintain the weeds on these tracts has come from the District and cooperating state agencies such as the Department of Environmental Protection and the Florida Fish and Wildlife Conservation Commission.

Responses and not to exceed quotes for the Non-native, Invasive Weed Control, Santa Fe Swamp project were received from the following four firms.

The Selection Committee composed of Charlie Houder, Jon Dinges and Melanie Roberts met February 8, 2012, to review the proposals and develop the ranking. As noted in the RFP, the committee was to search for the best value to the District amongst the submitted proposals. Proposals were compared on price, contractor experience in providing the service, and satisfaction of the listed references to successfully meet specific land management objectives. Rankings were made to select the most qualified and cost-effective contractor in the opinion of the District Selection Committee. Edko, LLC, was ranked first on these projects based on cost.

The principal for Edko, LLC, is Michael B. Vasko. Funds for these services have been appropriated in the current fiscal year under budget code 132586631000209005.

RFP 11/12-013
MEMORANDUM

TO: Governing Board

FROM: Carlos Herd, Senior Hydrogeologist

DATE March 22, 2012

RE: Authorization to Increase Expenditure Authority for Master Contracts with Selected Minimum Flows and Levels Consultants

RECOMMENDATION

Staff recommends the Governing Board authorize the Executive Director to expend an additional amount not to exceed $500,000 with selected minimum flows and levels (MFL) consultants for a total amount not to exceed $1,700,000 to provide technical assistance in the development of MFLs on an as-needed, when-needed basis.

BACKGROUND

Staff submitted a memorandum to the Governing Board at the November 2011 meeting requesting authorization to continue services under the MFL consultant qualification process executed by the Southwest Florida Water Management District (SWFWMD). Following Board approval, staff has issued nine work orders to six firms totaling a not to exceed amount of $527,886. Another $102,744 has been expended or committed for surveying services for the upper Suwannee River. Finally, the remaining revisions to the North Florida Model (NFM), the tool that will be used to determine withdrawal impacts on MFLs, are budgeted at an additional $157,204. The total of these contracted/issued monies is $787,834, leaving $412,166 for the remainder of the fiscal year.

Staff requests authorization to expand this services procurement to the maximum budgeted amount for the current fiscal year. This would increase authorized expenditures by $500,000 from $1,200,000 to $1,700,000. The remaining funds for the current fiscal year would then total $912,166.
Under this proposal, the District would continue existing master contracts, issuing Work Orders as needed. Prior to issuance of a Work Order, the scope of work, and total cost for each task is negotiated with the respective firm. Subsequently, upon written notice from the District, the consultant provides the required services on an as-needed basis.

Surveying services are not included in the SWFWMD consultant selection. Therefore, per prior Governing Board approval, any surveying services in excess of $35,000, while funded from the above monies, will require separate contracting and Governing Board authorization.

Having the flexibility to work with contractors in this manner has increased the efficiency of staff in pursuing this complex work. Since field and analytical work scopes often depend on the results of prior steps, each subsequent work order can be more explicitly tailored to the particulars of the waterbody in a highly collaborative process with the contractors. Staff is also planning to accelerate early stages of MFL development for subsequent waterbodies. This will result in earlier field data collection (water levels, surveying, and biology) and development of river models prior to analysis and production of each MFL technical report.

The task list to which the above additional funds would be applied include:

- Completion of the lower Santa Fe & Ichetucknee Rivers and Springs MFL
- Field data collection for the upper Suwannee River and Springs MFL
- HEC-RAS modeling of the upper Suwannee River
- Surveying of the middle Suwannee River
- A USGS project on White Sulphur and Suwannee Springs
- Lake Butler MFL

Detailed Work Orders and budgets for some of these tasks are still under development. Some tasks will extend into next fiscal year. Funds not expended in each fiscal year will carry forward to subsequent years. Funds for these contractual services are in the FY 2012 budget in Fund Codes 01 and 13.

/dd
MEMORANDUM

TO: Governing Board
FROM: Hugh Thomas, Suwannee River Partnership Coordinator
DATE: March 22, 2012
SUBJECT: Suwannee River Partnership (SRP) FY 2012 Suwannee Farms Nitrogen and Phosphorous Budget Project Funding Request, Contract Number 09/10-060

RECOMMENDATION

Staff recommends the Governing Board authorize the Executive Director to amend the FY 2011 contract with the Florida Department of Agriculture & Consumer Services (FDACS) to continue the Suwannee Farms Nitrogen and Phosphorous evaluation project. This will be the third and final year of this project. The amendment will allow for up to an additional $15,000 contribution to the project in conjunction with the other partners (FDACS, FDEP, UF-IFAS, and the farm) to fund the project.

BACKGROUND

As part of the Suwannee River Partnership’s efforts to work with land owners to solve water quality and quantity issues, a nutrient budget project, in cooperation with Suwannee Farms, was started in FY 2010. Last year partners helped fund ($10,000 each) this UF led project to help evaluate how nutrients are being used on the farm, and to help determine where management changes may be made to help reduce losses to the groundwater system.
The development and optimization of a nutrient mass balance budget can be an effective nutrient management tool for agricultural operations such as Suwannee Farms. Suwannee Farms is a large, diversified vegetable, row crop, and cattle feeding operation in Suwannee County, Florida, along the Suwannee River. The diversity of cropping systems employed on this farm makes it an ideal operation for determining nutrient budgets for a large farm operation. In addition, the 5,000 head cattle feeding operation utilizes anaerobic digestion for wastes generated from this portion of the farm.

The incorporation of the feeding operation with the digester on a crop farm is a unique aspect for this type of study, compared to other studies in the country. The cattle feeding operation offers an opportunity for determining a nutrient budget for that part of the farm. Further, determining nutrient budgets for the crop aspects of the farm operation will support decisions on how the feeding operation and the crop operations can be integrated to maximize the efficiency of nutrient management on the farm while reducing nutrient losses to the environment.

Funds for this project are available in the FY 2012 budget in the Suwannee River Water Quality Improvement Initiative Fund.

HT/dd
MEMORANDUM

TO: Governing Board

FROM: Tim Sagul, Senior Professional Engineer

DATE: March 22, 2012

RE: Rulemaking for 40B-2.301, Florida Administrative Code (F.A.C.)

RECOMMENDATION

Staff recommends the Governing Board authorize staff to:

1. Publish a Notice of Proposed Rule for section 40B-2.301, F.A.C.
2. File 40B-2.301, F.A.C., with the Department of State if no objections or comments are received.

BACKGROUND

Chapter 2010-205, sections 56 and 57, Laws of Florida, amended 373.250(3)(c), Florida Statutes, to direct the water management districts to initiate rulemaking no later than July 1, 2011, to implement the rulemaking requirements, which include “Provisions to require permit applicants to provide, as part of their reclaimed water feasibility evaluation for a nonpotable use, written documentation from a reuse facility addressing the availability of reclaimed water.” In August 2011, the Governing Board authorized publication of rule development for this rule.

If no objections or requests for workshop are filed within 21 days after publication, the District will file the proposed rules with the Joint Administrative Procedures Committee (JAPC) for review.

Governing Board authorization is required by 120.54(3), Florida Statutes, for filing of the rules for adoption. Filing with the Department of State will occur following JAPC review. The rules will become effective 20 days after filing with the Department of State.

A copy of the Notice of Proposed Rule follows this memorandum.

/rl
NOTICE OF PROPOSED RULE

NAME OF AGENCY:
Suwannee River Water Management District

RULE CHAPTER TITLE:
Permitting of Water Use

RULE CHAPTER NUMBER:
40B-2

RULE TITLES: RULE NOS.:
Condition for Issuance of Permits 40B-2.301

PURPOSE AND EFFECT: The purpose of the proposed rule is to implement rulemaking requirements as per Chapter 2010-205, sections 56 and 57, Laws of Florida, which amended Section 373.250(3)(c), Florida Statutes. The effect of the proposed amendments is to include provisions to require permit applicants to provide, as part of their reclaimed water feasibility evaluation for a nonpotable use, written documentation from a reuse facility addressing the availability of reclaimed water.

SUBJECT AREAS TO BE ADDRESSED: This proposed rule will require written documentation regarding reclaimed water feasibility evaluation. The proposed amendments will be located within the SRWMD Water Use Permitting Guide.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS (SERC) AND LEGISLATIVE RATIFICATION: The Agency has determined that this will have an adverse non-economic impact on small business because there will be an increase in time and effort to comply with this rule. This rule will not likely increase direct or indirect regulatory costs in excess of $200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: There is neither a cost nor an exemption from cost associated with these rules. The promulgation of this language is a result of a legislative mandate.
Any person, who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative, must do so in writing within 21 days of this notice.

SPECIFIC AUTHORITY: 373.113, 373.171 FS.
LAW IMPLEMENTED: 373.042, 373.0421, 373.185, 373.219, 373.223, 373.226, 373.227, 373.228, 373.229, 373.232, 373.236, 373.239, 373.250 FS.

IF REQUESTED WITHIN 21 DAYS OF THE DATE OF THIS NOTICE, A HEARING WILL BE SCHEDULED AND ANNOUNCED IN FAW.

THE FULL TEXT OF THE PROPOSED RULE IS:

40B-2.301 Conditions for Issuance of Permits.

(1) through (2)(k) No Change.

(3) The standards and criteria set forth in the Water Use Permitting Guide, effective DATE January 6, 2010, hereby incorporated by reference into this chapter, if met, will provide the reasonable assurances required in this section. This document is available at District headquarters and on the District’s website at www.mysuwanneeriver.com.

Rulemaking Authority 373.044, 373.113, 373.171 FS. Law Implemented 373.042, 373.0421, 373.185, 373.219, 373.223, 373.226, 373.227, 373.228, 373.229, 373.232, 373.236, 373.239, 373.250 FS. History–New 10-1-82, Amended 5-1-83, 1-6-10, AMEND DATE.

WATER USE PERMITTING GUIDE LANGUAGE
3.1.1.1. Implementation of Reclaimed Water Availability Documentation 373.250(3)(c), (d), F.S.

Applicants for withdrawals to be located within an area depicted by the District on its website as an area that is or may be served with reclaimed water by a reuse utility within five years from the date of application shall provide written documentation from the applicable reuse utility addressing the availability of reclaimed water. The applicant shall request the reuse utility to provide a letter stating that reclaimed service is not available or, the following information:
1) Whether a reclaimed water distribution line is at the applicant’s property boundary. If not, provide the following:
   a) Estimate the distance in feet from applicant’s property to the nearest potential connection point to a reuse line.
   b) The date the reuse utility anticipates bringing the connection to the applicant’s property boundary.

2) If reclaimed water is available at the property boundary:
   a) The peak, minimum and annual average daily quantity in gallons per day *or whatever measurement the WMD requires* of reclaimed water supply available from the nearest potential connection point, as well as expected average monthly quantities *or the applicable WMD measurement*.
   b) The reliability of the potential reclaimed water supply (i.e., on-demand 24/7, or bulk-interruptible diurnal or seasonal, length of supply agreement, or other basis).
   c) The typical operating pressures at which the reuse utility will provide reclaimed water at the nearest connection point to the applicant’s property, including any typical seasonal or other fluctuations in the operating pressure.

3) All costs associated with the applicant’s use of reclaimed water:
   a) The reclaimed water rate(s) the reuse utility would charge the applicant (e.g., the cost per/1000 gallons) and any other periodic fixed or minimum charges for use of reclaimed water by the applicant.
   b) Other one-time charges for the connection to the reuse.
   c) Whether the reuse utility helps fund potential reclaimed customers’ costs to connect to the reclaimed line or convert its operation to use reclaimed water. The reclaimed water availability charges the reuse utility would charge the applicant in lieu of connection to the reclaimed system.

4) The water quality parameters of the reclaimed water for the constituents that the applicant identifies as pertinent to the intended use.

5) Any additional information the reuse utility feels should be considered by the applicant in performing its technical or economic feasibility evaluation.

If the applicable reuse utility fails to respond or does not provide the information within 30 days after receipt of the applicant’s request, that applicant shall provide to the district a copy of the applicant’s written request and a statement that the utility failed to provide the requested information. If the reuse utility provides a partial response, the applicant shall also provide that to the district.

NAME OF SUPERVISOR OR PERSON WHO APPROVED THE PROPOSED RULE: Governing Board of the Suwannee River Water Management District.

DATE PROPOSED RULE APPROVED: April 10, 2012.

DATE NOTICE OF PROPOSED RULE DEVELOPMENT PUBLISHED IN FAW: August 26, 2011.
TO: Governing Board
FROM: Tim Sagul, Senior Professional Engineer
DATE: March 22, 2012
RE: Extension of Temporary Water Use Permit Number 2-97-00005M2, William Douberly Farm, Gilchrist and Levy Counties

RECOMMENDATION

Staff recommends the Governing Board extend Temporary Water Use Permit number 2-97-00005M2 until May 9, 2012, with seventeen standard conditions and seven special limiting conditions to William Douberly Farm in Gilchrist and Levy Counties.

BACKGROUND

The applicant requested a temporary permit on February 1, 2012, following the referral of the petition for administrative hearing to the Division of Administrative Hearings at the January 2012 Governing Board meeting. The Executive Director issued the first temporary permit on February 2, 2012, with an expiration date of February 15, 2012. At the February 14, 2012, Governing Board meeting, the Board reauthorized the temporary permit until March 14, 2012. At the March 13, 2012, Governing Board meeting, the Board reauthorized the temporary permit until April 11, 2012.

Section 373.244, Florida Statutes (F.S.) allows the District to issue temporary permits while the application is pending. It also notes that, if granted, temporary permits shall expire on the day following the next regular meeting of the Governing Board. Additionally, the Governing Board shall review temporary permits at each regular meeting and may terminate a temporary permit or refuse to extend it further upon a finding that the water use does not meet the criteria set forth in District rule 40B-2.441, Florida Administrative Code (F.A.C.) that adverse effects are occurring as a result of water use under the temporary permit, or that the water authorized to be used under such permit is no longer required by the permit holder. If the Governing Board extends the term of a temporary permit for subsequent periods, the expiration date shall be on or before the day following the next regular meeting of the Governing Board.

Staff has determined that the temporary application is complete and satisfies the conditions for issuance in Chapter 40B-2, F.A.C., and Chapter 373, F.S.

Subject:   Approval of Temporary Water Use Permit Number 2-97-00005M2, William Douberly Farm, Gilchrist and Levy Counties

Dear Mr. Douberly:

Suwannee River Water Management District (District) staff proposes to recommend that the Governing Board extend the above-mentioned temporary permit until May 9, 2012.

This proposed action is subject to final decision of the Governing Board at their regularly scheduled meeting, which is open to the public.

Please call permitting staff at 386.362.1001 if you have any questions.

Sincerely,

STAFF REPORT

TEMPORARY WATER USE PERMIT

DATE: March 22, 2012

PROJECT: William Douberly Farm

APPLICANT: William Douberly Farm
13720 SW 4th LN
Newberry, FL 32066

PERMIT APPLICATION NO.: 2-97-00005M2

DATE OF APPLICATION: January 8, 2007
APPLICATION COMPLETE: October 3, 2011

Previous Quantities: Proposed Quantities:

| Average Daily Rate (ADR) | 0.6723* | mgd | 1.1691 | mgd |

* This will void the Richard Beauchamp permit (2-93-00097*)

Recommended Agency Action

Staff recommends extension of Temporary Water Use Permit 2-97-00005M2 for the continued use of an existing row crop and livestock operation within Gilchrist and Levy County. This will void the Richard Beauchamp permit (2-93-00097*) in order to consolidate both operations. The permit will include seventeen standard conditions and seven special limiting conditions. The temporary permit will expire on May 9, 2012.

Project Review Staff

Kevin Wright, P.E.; Ronald Spencer; and Tim Sagul, P.E., have reviewed the application.

Project Location

The withdrawal facilities are located in Township 10 South, Range 15 East, and Section 35, Township 11 South, Range 16 East, and Sections 6 & 7 in Levy County, and Township 10 South, Range 16 East, and Sections 31 & 32 in Gilchrist County. The project is located within the lower Suwannee River and Waccasassa River basins according to the USGS National Hydrography Dataset, Hydrologic Unit Code-8 sub basins.
**Project Description**

The project area consists of approximately 1,695 acres (388 owned acres, 1,307 leased acres) with approximately 505 acres being irrigated using groundwater. Irrigation of the applicants 505 wetted acreage is accomplished using six center pivots, two proposed pivots, and drip tape. The operation also includes approximately 400 beef cows.

The water use calculations are based upon the irrigated acreage, livestock and crop types provided by William P. Douberly Jr. Crops include corn, peanuts, watermelon, sorghum and winter rye. The Average Daily Rate (ADR) of withdrawal will be 1.1691 mgd. The ADR equates to 31.1 inches of supplemental irrigation annually and an average of 15 gallons per day per head of cattle.

The project area includes eight active wells and one inactive well. Use of the wells will be for irrigation and livestock. The well inventory includes the following: one 2-inch well, two 4-inch wells, and six 10-inch wells. A list of wells can be found in the table on Attachment A.

**Demonstration of Need**

The applicant has provided information that supports the requested allocation, based upon number of livestock, crop types, and irrigated acres.

**Water Conservation**

The applicant has completed the Water Conservation worksheets for Center Pivot Irrigation, Livestock Watering, and Drip Irrigation Systems.

**Harm Analysis**

Staff determined through the SRWMD North Florida Model, version 1.0, that the proposed water use would not violate minimum flows and levels (MFLs) at any downstream MFL points established along the Suwannee River or its tributaries. However, a special limiting condition has been included in the permit for the District to seek a modification to the permit to assist in the recovery and/or prevention strategy associated with an adopted MFL.
Application Timeline

Staff recommended issuance of the modification at the December 13, 2011, Governing Board meeting. A petition requesting an Administrative Hearing was received on January 3, 2012. The Governing Board referred the petition to DOAH on January 10, 2012. The Executive Director issued the first temporary permit on February 2, 2012, with an expiration date of February 15, 2012. At the February 14, 2012 Governing Board meeting, the Board reauthorized the temporary permit until March 14, 2012. At the March 13, 2012 Governing Board meeting, the Board reauthorized the temporary permit until April 11, 2012.

Standard Conditions

1. Nothing in this permit should be construed to limit the authority of the Suwannee River Water Management District to declare a water shortage and issue orders pursuant to Section 373.175, Florida Statutes, (F.S.) or to formulate a rule for implementation during times of water shortage pursuant to Section 373.246, Florida Statutes. In the event of water shortage as declared by the Board, the permittee shall adhere to any limitations on withdrawal or use ordered by the District.

2. This permit is classified as unconfined Floridan aquifer for overhead irrigation.

3. Permittee shall allow District personnel at reasonable times and at District expense or with District equipment to monitor withdrawal rates and volumes authorized by this permit.

4. Capping of Withdrawals Not In Use: Any wells not in use, and in which pumping equipment is not installed shall be capped or valved in a water tight manner in accordance with Chapter 62-532.500(4)(a)4., F.A.C.

5. The permittee may apply for a permit modification at any time in accordance with Section 40B-2.331, F.A.C.

6. In the event of a District-declared water shortage, the permittee must immediately comply with any restrictions or requirements ordered in accordance with the District's Water Shortage Plan, Chapter 40B-21, F.A.C.

7. Permittee must mitigate interference with existing legal uses caused in whole or in part by the permittee's withdrawals, consistent with a District-approved mitigation plan. As necessary to offset such interference, mitigation may include, but is not limited to, reducing pumpage, replacing the existing legal user's
withdrawal equipment, relocating wells, changing withdrawal source, supplying water to existing legal user, or other means needed to mitigate the impacts.

8. Permittee must mitigate harm to existing off-site land uses caused by the permittee's withdrawals. When harm occurs, or is imminent, the permittee must modify withdrawal rates or mitigate the harm.

9. Permittee must mitigate harm to the natural resources caused by the permittee's withdrawals. When harm occurs or is imminent, the permittee must modify withdrawal rates or mitigate the harm.

10. If any condition of the permit is violated, the permittee shall be subject to enforcement action pursuant to Chapter 373, F.S.

11. Authorized representatives of the District, upon reasonable notice to the permittee, shall be permitted to enter and inspect the permitted water use to determine compliance with the permit conditions.

12. This permit does not relieve the permittee from complying with any applicable local government, state, or federal law, rule, or ordinance.

13. This permit does not convey to the permittee any property rights or privileges other than those specified herein.

14. Permittee shall notify the District in writing within 90 days of any sale, conveyance, or other transfer of ownership or control of the real property on which the permitted water use activities are located. All water use permit transfers are subject to the requirements of section 40B-2.301, F.A.C.

15. Permittee must notify the District in writing prior to implementing any changes in the water use that may alter the permit allocations. Such changes include, but are not limited to, change in irrigated acreage, crop type, irrigation system, water treatment method, or entry into one or more large water use agreements. In the event a proposed change will alter the allocation, permittee must first obtain a permit modification.

16. When the District provides a permanent identification tag, the tag shall be prominently displayed at the withdrawal site by permanently affixing such tag to the pump, headgate, valve, or other withdrawal facility. If the permit covers several facilities such as a well field, a tag shall be affixed to each facility. Failure to display a tag as prescribed herein shall constitute a violation of the permit. The permittee shall be allowed ten (10) days after the notice of violation of this section to obtain a replacement tag.
17. The District reserves the right to open this permit, following notice to the permittee, to include a permit condition prohibiting withdrawals for resource protection.

Special Limiting Conditions

18. All correspondence sent to the District regarding this permit must include the permit number 2-97-00005M2.

19. The Permittee shall ensure that the irrigation systems will water target areas only under field operations. Irrigation of non-target areas (roads, woods, structures, etc.) is prohibited.

20. The Permittee shall implement and/or maintain the conservation practices selected on the water conservation worksheet(s) which are associated with this permit. Any new practices selected shall be implemented in one year from the date of permit issuance. Practices that involve scheduling methods or maintenance shall be documented. Documentation for implementation and/or maintenance shall be maintained on all practices and available upon request.

21. The Permittee shall submit a plan for monitoring groundwater withdrawals, at the Permittee’s expense, within one year of issuance. This plan shall be implemented within one year after District approval. Reporting shall take place every three months and provided to the District on or before the fifteenth day of the following month.

22. The issuance of this Temporary Water use Permit shall not in any way be construed as a commitment to issue a water use permit.

23. The permitted water withdrawal facilities are listed in the table on Attachment A.

24. This temporary permit shall expire on May 9, 2012.

MEMORANDUM

TO:      Governing Board
FROM:    Tim Sagul, Senior Professional Engineer
DATE:    March 22, 2012
RE:      Extension of Temporary Water Use Permit Number
          2-11-00040, Loncala Dairies, Gilchrist County

RECOMMENDATION

Staff recommends the Governing Board extend
Temporary Water Use Permit number 2-11-00040
until May 9, 2012, with seventeen standard
conditions and eight special limiting conditions to
Alliance Grazing Group in Gilchrist County.

BACKGROUND

The applicant requested a temporary permit on January 11, 2012, following the
referral of the petition for administrative hearing to the Division of Administrative
Hearings at the January 2012 Governing Board meeting. The Executive Director
issued the first temporary permit on January 19, 2012, with an expiration date of
February 15, 2012. At the February 14, 2012, Governing Board meeting, the Board
reauthorized the temporary permit until March 14, 2012. At the March 13, 2012,
Governing Board meeting, the Board reauthorized the temporary permit until April
11, 2012.

Section 373.244, Florida Statutes (F.S.), allows the District to issue temporary permits
while the application is pending. It also notes that, if granted, temporary permits shall
expire on the day following the next regular meeting of the Governing Board. Additionally,
the Governing Board shall review temporary permits at each regular meeting and may
terminate a temporary permit or refuse to extend it further upon a finding that the water use
does not meet the criteria set forth in District rule 40B-2.441, Florida Administrative Code
(F.A.C.) that adverse effects are occurring as a result of water use under the temporary
permit, or that the water authorized to be used under such permit is no longer required by
the permit holder. If the Governing Board extends the term of a temporary permit for
subsequent periods, the expiration date shall be on or before the day following the next
regular meeting of the Governing Board.

Staff has determined that the temporary application is complete and satisfies the conditions
for issuance in Chapter 40B-2, F.A.C., and Chapter 373, F.S.

Previous Quantities: Proposed Quantities:

| Average Daily Rate (ADR) | - | mgd | 2.4541 | mgd |

Recommended Agency Action
Staff recommends extension of Temporary Water Use Permit 2-11-00040 for the establishment of a row crop operation within Gilchrist County. The permit will include seventeen standard conditions and eight special limiting conditions. The temporary permit will expire on May 9, 2012.

**Project Review Staff**

Kevin Wright, P.E.; Ronald Spencer; and Tim Sagul, P.E., have reviewed the application.

**Project Location**

The withdrawal facilities are located in Township 09 South, Range 16 East, Sections 09, 10, and 22 in Gilchrist County. The project is located within the Santa Fe River basin according to the USGS National Hydrography Dataset, Hydrologic Unit Code-8 sub basins.

**Project Description**

The project area consists of approximately 1,183 acres with approximately 976 acres being irrigated with 7 new center pivots supplied by groundwater. The applicant has applied to establish a row crop operation to support the other dairies associated with Alliance Grazing Group. The 7 pivots will have a crop rotation of spring corn, fall sorghum and winter cover crop.

The water use calculations are based upon the row crop irrigated acreage, crop rotation, and crop types provided by Alliance Grazing Group. All pivots will use the latest sprinkler packages. The Average Daily Rate (ADR) will be 2.4541 mgd. The ADR equates to 33.8 inches of supplemental irrigation annually. The temporary water use reflects a 1.3386 mgd reduction from the permit issued at the December 2011 Governing Board meeting. The reduction in permitted allocation is due to the dairy facilities not being constructed at this time.

The project will have 4 proposed irrigation wells. A list of wells can be found in the table on Attachment A.

**Demonstration of Need**

The applicant has provided information that supports the requested allocation, based upon crop types, crop rotation and irrigated acres.

**Water Conservation**
Alliance Grazing Group has completed the water conservation worksheets for the center pivot irrigation systems.

**Harm Analysis**

Staff determined through the SRWMD North Florida Model, version 1.0 and the Intera Adaptation of USGS Peninsular Florida Groundwater Flow Model, January 2011, that the proposed water use would not violate minimum flows and levels (MFLs) at any downstream MFL points established along the Suwannee River or its tributaries. However, a special limiting condition has been included in the permit for the District to seek a modification to the permit to assist in the recovery and/or prevention strategy associated with an adopted MFL.

**Application Timeline**

Staff recommended issuance of a 20-year permit at the December 13, 2011, Governing Board meeting. A petition requesting an Administrative Hearing was received on January 3, 2012. The Governing Board referred the petition to DOAH on January 10, 2012. The Executive Director issued the first temporary permit on January 19, 2012, with an expiration date of February 15, 2012. At the February 14, 2012 Governing Board meeting, the Board reauthorized the temporary permit until March 14, 2012. At the March 13, 2012 Governing Board meeting, the Board reauthorized the temporary permit until April 11, 2012.

**Standard Conditions**

1. Nothing in this permit should be construed to limit the authority of the Suwannee River Water Management District to declare a water shortage and issue orders pursuant to Section 373.175, Florida Statutes, (F.S.) or to formulate a rule for implementation during times of water shortage pursuant to Section 373.246, Florida Statutes. In the event of water shortage as declared by the Board, the permittee shall adhere to any limitations on withdrawal or use ordered by the District.

2. This permit is classified as unconfined Floridan aquifer for overhead irrigation.

3. Permittee shall allow District personnel at reasonable times and at District expense or with District equipment to monitor withdrawal rates and volumes authorized by this permit.

4. Capping of Withdrawals Not In Use: Any wells not in use, and in which pumping equipment is not installed shall be capped or valved in a water tight manner in accordance with Chapter 62-532.500(4)(a)4., F.A.C.

5. The permittee may apply for a permit modification at any time in accordance with Section 40B-2.331, F.A.C.
6. In the event of a District-declared water shortage, the permittee must immediately comply with any restrictions or requirements ordered in accordance with the District's Water Shortage Plan, Chapter 40B-21, F.A.C.

7. Permittee must mitigate interference with existing legal uses caused in whole or in part by the permittee's withdrawals, consistent with a District-approved mitigation plan. As necessary to offset such interference, mitigation may include, but is not limited to, reducing pumpage, replacing the existing legal user's withdrawal equipment, relocating wells, changing withdrawal source, supplying water to existing legal user, or other means needed to mitigate the impacts.

8. Permittee must mitigate harm to existing off-site land uses caused by the permittee's withdrawals. When harm occurs, or is imminent, the permittee must modify withdrawal rates or mitigate the harm.

9. Permittee must mitigate harm to the natural resources caused by the permittee's withdrawals. When harm occurs or is imminent, the permittee must modify withdrawal rates or mitigate the harm.

10. If any condition of the permit is violated, the permittee shall be subject to enforcement action pursuant to Chapter 373, F.S.

11. Authorized representatives of the District, upon reasonable notice to the permittee, shall be permitted to enter and inspect the permitted water use to determine compliance with the permit conditions.

12. This permit does not relieve the permittee from complying with any applicable local government, state, or federal law, rule, or ordinance.

13. This permit does not convey to the permittee any property rights or privileges other than those specified herein.

14. Permittee shall notify the District in writing within 90 days of any sale, conveyance, or other transfer of ownership or control of the real property on which the permitted water use activities are located. All water use permit transfers are subject to the requirements of section 40B-2.301, F.A.C.

15. Permittee must notify the District in writing prior to implementing any changes in the water use that may alter the permit allocations. Such changes include, but are not limited to, change in irrigated acreage, crop type, irrigation system, water treatment method, or entry into one or more large water use agreements. In the event a proposed change will alter the allocation, permittee must first obtain a permit modification.
16. When the District provides a permanent identification tag, the tag shall be prominently displayed at the withdrawal site by permanently affixing such tag to the pump, headgate, valve, or other withdrawal facility. If the permit covers several facilities such as a well field, a tag shall be affixed to each facility. Failure to display a tag as prescribed herein shall constitute a violation of the permit. The permittee shall be allowed ten (10) days after the notice of violation of this section to obtain a replacement tag.

17. The District reserves the right to open this permit, following notice to the permittee, to include a permit condition prohibiting withdrawals for resource protection.

**Special Limiting Conditions**

18. All correspondence sent to the District regarding this permit must include the permit number 2-11-00040.

19. Consistent with condition nine, the Permittee shall mitigate harm to Waters Lake following notice from the District. Mitigation may include, but is not limited to reduction of withdrawals and relocation of wells.

20. The Permittee shall ensure that the irrigation systems will water target areas only under field operations. Irrigation of non-target areas (roads, woods, structures, etc.) is prohibited.

21. The Permittee shall implement and/or maintain the conservation practices selected on the water conservation worksheet(s) which are associated with this permit. Any new practices selected shall be implemented in one year from the date of permit issuance. Practices that involve scheduling methods or maintenance shall be documented. Documentation for implementation and/or maintenance shall be maintained on all practices and available upon request.

22. The issuance of this Temporary Water use Permit shall not in any way be construed as a commitment to issue a water use permit.

23. The permitted water withdrawal facilities are listed in the table on Attachment A.

24. This temporary permit shall expire on May 9, 2012.

25. The Permittee shall submit a plan for monitoring groundwater withdrawals, at the Permittee’s expense, within one year of issuance. This plan shall be implemented within one year after District approval. Reporting shall take place every three months and provided to the District on or before the fifteenth day of the following month.

MEMORANDUM

TO: Governing Board

FROM: Tim Sagul, Senior Professional Engineer

DATE: March 22, 2012

RE: Extension of Temporary Water Use Permit Number 2-11-00041, Piedmont Dairy, Gilchrist County

RECOMMENDATION

Staff recommends the Governing Board extend Temporary Water Use Permit number 2-11-00041 until May 9, 2012, with seventeen standard conditions and seven special limiting conditions to Piedmont Dairy, Inc., in Gilchrist County.

BACKGROUND

The applicant requested a temporary permit on January 11, 2012, following the referral of the petition for administrative hearing to the Division of Administrative Hearings at the January 2012 Governing Board meeting. The Executive Director issued the first temporary permit on January 19, 2012, with an expiration date of February 15, 2012. At the February 14, 2012, Governing Board meeting, the Board reauthorized the temporary permit until March 14, 2012. At the March 13, 2012, Governing Board meeting, the Board reauthorized the temporary permit until April 11, 2012.

Section 373.244, Florida Statutes (F.S.) allows the District to issue temporary permits while the application is pending. It also notes that, if granted, temporary permits shall expire on the day following the next regular meeting of the Governing Board. Additionally, the Governing Board shall review temporary permits at each regular meeting and may terminate a temporary permit or refuse to extend it further upon a finding that the water use does not meet the criteria set forth in District rule 40B-2.441, Florida Administrative Code (F.A.C.) that adverse effects are occurring as a result of water use under the temporary permit, or that the water authorized to be used under such permit is no longer required by the permit holder. If the Governing Board extends the term of a temporary permit for subsequent periods, the expiration date shall be on or before the day following the next regular meeting of the Governing Board.

Staff has determined that the temporary application is complete and satisfies the conditions for issuance in Chapter 40B-2, F.A.C., and Chapter 373, F.S.

Piedmont Farms, Inc.
569 Edgewood Avenue
Jacksonville, FL 32205

Subject: Approval of Temporary Water Use Permit Number 2-11-00041, Piedmont Dairy, Gilchrist County

Dear Mr. St. John:

Suwannee River Water Management District (District) staff proposes to recommend that the Governing Board extend the above-mentioned temporary permit until May 9, 2012.

This proposed action is subject to final decision of the Governing Board at their regularly scheduled meeting, which is open to the public.

Please call permitting staff at 386.362.1001 if you have any questions.

Sincerely,

Tim Sagul, P. E.
Senior Professional Engineer

Previous Quantities: Proposed Quantities:

| Average Daily Rate (ADR) | 1.7339* mgd | 2.6513 mgd |

* Piedmont Farms, Inc., has elected to void its current permit (2-97-00077R*)

Recommended Agency Action

Staff recommends extension of Temporary Water Use Permit 2-11-00041 for the establishment of one new grazing dairy in conjunction with an existing dairy and associated irrigated acreage within Gilchrist County. Piedmont Farms, Inc. has elected to void its current permit (2-97-00077R) in order to consolidate both operations. The permit will include seventeen standard conditions and seven special limiting conditions. The temporary permit will expire on May 9, 2012.
**Project Review Staff**

Kevin Wright, P.E.; Ronald Spencer; and Tim Sagul, P.E., have reviewed the application.

**Project Location**

The withdrawal facilities are located in Township 09 South, Range 15 East, Sections 32, 33, and Township 10 South, Range 15 East, Sections 04, and 05 in Gilchrist County. The project is located within the lower Suwannee River basin according to the USGS National Hydrography Dataset, Hydrologic Unit Code-8 sub basins.

**Project Description**

The project area consists of approximately 1,967 acres with approximately 1,101 acres being irrigated with two existing center pivots and six new pivots supplied by groundwater and supplemented with wastewater. Piedmont Farms, Inc., will maintain the existing dairy and establish an additional grazing dairy within this property, milking approximately 2,880 cows with approximately 700 dry cows.

The water use calculations are based upon the provided irrigated acreage, crop rotation, crop types and livestock. All pivots will use the latest sprinkler packages. The Average Daily Rate (ADR) will be 2.6513 mgd. The ADR equates to 30.3 inches of supplemental irrigation annually (including cooling water) and an average of 46.8 gallons per day per head of cattle.

The project will have 6 existing wells and 4 proposed wells; seven wells for irrigation and three livestock wells. A list of wells can be found in the table on Attachment A.

**Demonstration of Need**

The applicant has provided information that supports the requested allocation, based upon crop types, crop rotation, irrigated acres, and number of livestock.

**Water Conservation**

Piedmont Dairy has completed the water conservation worksheets for center pivot irrigation and livestock.
Harm Analysis

Staff determined through the SRWMD North Florida Model, version 1.0, that the proposed water use would not violate minimum flows and levels (MFLs) at any downstream MFL points established along the Suwannee River or its tributaries. However, a special limiting condition has been included in the permit for the District to seek a modification to the permit to assist in the recovery and/or prevention strategy associated with an adopted MFL.

Application Timeline

Staff recommended issuance of a 20-year permit at the December 13, 2011, Governing Board meeting. A petition requesting an Administrative Hearing was received on January 3, 2012. The Governing Board referred the petition to DOAH on January 10, 2012. The Executive Director issued the first temporary permit on January 19, 2012, with an expiration date of February 15, 2012. At the February 14, 2012 Governing Board meeting, the Board reauthorized the temporary permit until March 14, 2012. At the March 13, 2012 Governing Board meeting, the Board reauthorized the temporary permit until April 11, 2012.

Standard Conditions

1. Nothing in this permit should be construed to limit the authority of the Suwannee River Water Management District to declare a water shortage and issue orders pursuant to Section 373.175, Florida Statutes, (F.S.) or to formulate a rule for implementation during times of water shortage pursuant to Section 373.246, Florida Statutes. In the event of water shortage as declared by the Board, the permittee shall adhere to any limitations on withdrawal or use ordered by the District.

2. This permit is classified as unconfined Floridan aquifer for overhead irrigation.

3. Permittee shall allow District personnel at reasonable times and at District expense or with District equipment to monitor withdrawal rates and volumes authorized by this permit.

4. Capping of Withdrawals Not In Use: Any wells not in use, and in which pumping equipment is not installed shall be capped or valved in a water tight manner in accordance with Chapter 62-532.500(4)(a)4., F.A.C.

5. The permittee may apply for a permit modification at any time in accordance with Section 40B-2.331, F.A.C.
6. In the event of a District-declared water shortage, the permittee must immediately comply with any restrictions or requirements ordered in accordance with the District's Water Shortage Plan, Chapter 40B-21, F.A.C.

7. Permittee must mitigate interference with existing legal uses caused in whole or in part by the permittee's withdrawals, consistent with a District-approved mitigation plan. As necessary to offset such interference, mitigation may include, but is not limited to, reducing pumpage, replacing the existing legal user's withdrawal equipment, relocating wells, changing withdrawal source, supplying water to existing legal user, or other means needed to mitigate the impacts.

8. Permittee must mitigate harm to existing off-site land uses caused by the permittee's withdrawals. When harm occurs, or is imminent, the permittee must modify withdrawal rates or mitigate the harm.

9. Permittee must mitigate harm to the natural resources caused by the permittee's withdrawals. When harm occurs or is imminent, the permittee must modify withdrawal rates or mitigate the harm.

10. If any condition of the permit is violated, the permittee shall be subject to enforcement action pursuant to Chapter 373, F.S.

11. Authorized representatives of the District, upon reasonable notice to the permittee, shall be permitted to enter and inspect the permitted water use to determine compliance with the permit conditions.

12. This permit does not relieve the permittee from complying with any applicable local government, state, or federal law, rule, or ordinance.

13. This permit does not convey to the permittee any property rights or privileges other than those specified herein.

14. Permittee shall notify the District in writing within 90 days of any sale, conveyance, or other transfer of ownership or control of the real property on which the permitted water use activities are located. All water use permit transfers are subject to the requirements of section 40B-2.301, F.A.C.

15. Permittee must notify the District in writing prior to implementing any changes in the water use that may alter the permit allocations. Such changes include, but are not limited to, change in irrigated acreage, crop type, irrigation system, water treatment method, or entry into one or more large water use
agreements. In the event a proposed change will alter the allocation, permittee must first obtain a permit modification.

16. When the District provides a permanent identification tag, the tag shall be prominently displayed at the withdrawal site by permanently affixing such tag to the pump, headgate, valve, or other withdrawal facility. If the permit covers several facilities such as a well field, a tag shall be affixed to each facility. Failure to display a tag as prescribed herein shall constitute a violation of the permit. The permittee shall be allowed ten (10) days after the notice of violation of this section to obtain a replacement tag.

17. The District reserves the right to open this permit, following notice to the permittee, to include a permit condition prohibiting withdrawals for resource protection.

Special Limiting Conditions

18. All correspondence sent to the District regarding this permit must include the permit number 2-11-00041.

19. The Permittee shall ensure that the irrigation systems will water target areas only under field operations. Irrigation of non-target areas (roads, woods, structures, etc.) is prohibited.

20. The Permittee shall implement and/or maintain the conservation practices selected on the water conservation worksheet(s) which are associated with this permit. Any new practices selected shall be implemented in one year from the date of permit issuance. Practices that involve scheduling methods or maintenance shall be documented. Documentation for implementation and/or maintenance shall be maintained on all practices and available upon request.

21. The issuance of this Temporary Water use Permit shall not in any way be construed as a commitment to issue a water use permit.

22. The permitted water withdrawal facilities are listed in the table on Attachment A.

23. This temporary permit shall expire on May 9, 2012.

24. The Permittee shall submit a plan for monitoring groundwater withdrawals, at the Permittee’s expense, within one year of issuance. This plan shall be implemented within one year after District approval. Reporting shall take place
every three months and provided to the District on or before the fifteenth day of the following month.

MEMORANDUM

TO:   Governing Board

FROM: Carlos Herd, Senior Hydrogeologist

DATE: March 22, 2012

RE: Water Supply Program Activity Report

SRWMD/SJRWMD/DEP Interagency Agreement:

- Staff attended a meeting with SJRWMD staff to further review the revised hydrostratigraphic framework for the regional modeling efforts on March 15 at the SJRWMD office located in Palatka.

Water supply planning:

- Staff attended a meeting with SJRWMD staff to review the proposed North Florida Aquifer Replenishment Project at the SRWMD office in Live Oak on February 16.
- Staff attended, via teleconference, a Central Florida Water Initiative (CFWI) population and water demand subgroup meeting on February 21. Staff plans to continue to attend these meetings by teleconference to maintain a level of understanding of statewide population and water demand methodologies.
- Staff attended a meeting where SJRWMD staff presented the aquifer replenishment pilot test proposal to the Bradford County Manager on March 7 at the Bradford County Administration offices in Starke.
- Changes to the Interagency Agreement provide for the completion of a joint regional water supply plan between the SRWMD and SJRWMD.
- Staff continues to meet regularly with SJRWMD via conference calls to coordinate activities in the water supply planning and permitting processes.
- Staff worked with DEP and SJRWMD to charter a stakeholder committee for the North Florida Regional Water Supply Partnership. The initial public meeting for the Partnership was held on March 7, 2012 at the Alachua City Hall from 6:00 pm to 8:00 pm.

Interstate coordination:

- The next Florida/Georgia coordination meeting is scheduled for March 29, 2012, from 9:00 am to 3:00 pm, at the Wiregrass Technical College located in Valdosta, Georgia. Dr. George Cole is planning to attend along with staff.

CH/dd
MEMORANDUM

TO: Governing Board

FROM: Megan Wetherington, Senior Professional Engineer

DATE: March 22, 2012

Staff collected water chemistry samples at 6 groundwater sites; recorded levels and maintained stations at 181 wells, 21 lakes, and 19 stream stations; and reported rainfall from 38 sites to the National Weather Service. Agricultural water use was monitored at 194 wells on 48 agricultural operations.

Duplicate water samples were sent to the SJRWMD laboratory for analysis in addition to the samples sent to the District’s contracted laboratory as part of a pilot project to reduce costs, improve efficiency at both agencies, and share data. The test will be repeated in June. Technicians also collected split samples at their regular Alachua sites on behalf of Alachua County for nitrogen isotope analysis, eliminating the county’s need to sample the sites separately.

Staff worked with DEP to identify six water quality monitor wells that were being sampled by both agencies. These sites were eliminated from the District’s water quality network but will remain in our level network.

Installation of telemetry on wells and surfacewater gages continued, with 63 new sites installed to date. The automation of the network has allowed data collection to proceed with two fewer staff positions than a year ago.

Staff assisted SJRWMD well drillers to locate a new upper Floridan monitor well site on the District’s Falling Creek property. The new site will be run in tandem with and eventually replace a nearby, long-term well on private property as part of efforts to secure the integrity of the network.

Thank you for your attention to this summary of current activities. Please feel free to contact staff prior to the April 10, 2012, Governing Board meeting if you would like further information.

RE: Minimum Flows and Levels (MFLs) Activity Report

The following information is aggregated by water body and organized by anticipated completion date. Budgets shown are for Work Orders issued to date and do not include anticipated monies.

Lower Santa Fe and Ichetucknee Rivers & Springs

- Final calibration of the HEC-RAS river model was completed on March 16th, and will be received as evidence of task completion with the next invoice from INTERA.
- Model production runs are planned for the latter half of March.
- Work orders for the data analysis and project report are under development.

Upper Suwannee River & Springs

- A surveying firm (AMEC) is under contract and began work on March 12th. The work is scheduled for completion within 60 days.
- A project is being proposed to sample water from White Sulphur Spring and Suwannee Spring. This work would be done by the USGS. A draft scope of work and cost are being developed. Water samples would be analyzed for their isotope chemistry to help determine the hydrogeologic source and age of this sulfur-laden water. This will help with placement of these springs in the correct geologic stratum of the District’s North Florida Model (under revision), and thus provide more defensible MFL evaluations of the cause of impacts to these springs. At White Sulphur Spring this work may involve a cave diving
event (under a separate contract) to check access for equipment, ascertain sampling depth, and properly place a suction line, at depth, to allow water sample extraction in this typically dry spring.

- HSW Engineering has begun work on in-channel habitat assessments.

Rule development and adoption

The rulemaking schedule follows this report. Staff is participating in joint meetings and conference calls with the Department of Environmental Protection (DEP) and the other Water Management District’s (WMD) to address any rule changes required as a result of the recent legislative session and as they relate to water use and environmental resource permitting consistency.

Staff Outreach

- Staff is working on a charter to implement the E-permitting process in cooperation with St. Johns River Water Management District. The Water Well construction portion will be implemented first with ERP and Water Use to follow. Testing for the water well construction portion began this month.
- Staff continued to coordinate with FDEP and water management districts on reclaimed water policy.
- Staff continues to meet with representatives from PCS Phosphate concerning an upcoming permit consolidation.
- Staff continues to attend the Columbia County and Suwannee County Catalyst Working Groups to discuss regulatory issues.
- Staff has scheduled a meeting with Todd Stevens of Holly Factory to discuss permit modification which may be presented at the June Governing Board meeting.
- Staff continues to participate in discussions on water use permitting consistency with FDEP and the other water management districts.
- Staff continues the process of locating all impoundments on the Dam Inventory List within the boundaries or the Suwannee River water Management District.

Thank you for your attention to this summary of current activities. Please feel free to contact staff prior to the Governing Board meeting if you would like further information.

MEMORANDUM

TO:     Governing Board
FROM:   Hugh Thomas, Suwannee River Partnership Coordinator
DATE:   March 22, 2012
RE:     Suwannee River Partnership (SRP) Program Activity Report

Staff met with Florida Department of Environmental Protection (FDEP) and industry staff to discuss a new initiative called 3E; Environment, Energy, and Economics. This initiative would evaluate interest and feasibility in bioenergy production related to water quality and quantity.

Staff continues to meet with poultry producers to update poultry operation conservation plans under the Conservation Technical Assistance agreement with the United States Department of Agriculture - Natural Resources Conservation Service.

Partnership staff met with UF-IFAS and participating farmers for the USDA Conservation Innovation Grant (CIG) program to discuss crop management for the upcoming year.

Planning was conducted with the FDEP staff to coordinate with farms selected for the Sod-Based Rotation Project.

Staff continues to work with the mobile irrigation lab (MIL) staff to coordinate producer evaluations. Additionally, staff has met with the MIL team to develop the costs related to retrofitting over 40 center pivot irrigation systems in the District.

SRP staff conducted presentations at local high schools and the University of Florida on springs protection, agriculture and water related issues.

Staff attended and presented at several agricultural commodity meetings related to water quality, water supply issues and related best management practices.

SRP staff continues to work with the Levy Soil and Water Conservation District to develop contracts with producers for the Florida Department of Agricultural and Consumer Sciences (FDACS) center pivot retrofit program whereby new nozzles, regulators, end guns, and other equipment as recommended by the MIL will be installed.
Staff continues to work with regulatory staff in assisting with water use permit renewals, modifications and new permits.

Partnership staff continues to conduct the University of Florida Public Issues Education Center for Agriculture and Natural Resources survey for which the results will be assessed later this year.

SRP staff met with District staff and several industry representatives including Farm Bureau, dairy, and poultry representatives to discuss the various components necessary to develop a water use monitoring and reporting program for the District.

Staff assisted the Natural Resources Conservation Service with conducting an outreach meeting for the Gulf of Mexico Initiative. Staff assisted producers with necessary applications to apply for conservation practices.

Staff continues to assist with resolving irrigation and other agriculture-related complaints.

Staff continues to visit farmers for enrollment in Best Management Practice (BMP) programs and to assist with BMP implementation assurance, BMP follow-up, sampling assistance, record keeping assistance, and other education. To date, staff has enrolled approximately 328 farms with signed FDACS Notices of Intent to implement BMPs on 176,000 acres. Of the 328 farms, 252 have received cost share as part of the SRP BMP Tools Program.

Based on record checks and the SRP Progressive Farms Program, fertilizer savings are 50 to 80 lbs/acre. Using a 50 pounds savings, this equates to 8,800,000 pounds (4,400 tons) less fertilizer being applied in the basin because of BMP implementation and use of BMP tools. Currently there are 29 farms awaiting cost share for BMP tools representing approximately 9,000 acres.

Thank you for your attention to this summary of current activities. Please feel free to contact staff prior to the April 10, 2012, Governing Board meeting if you would like further information.

HT/dd
MEMORANDUM

TO: Governing Board
FROM: Bob Heeke, Senior Land Resources Manager
DATE: March 22, 2012
SUBJECT: Land Management Activity Report

NATURAL RESOURCE MANAGEMENT

Invasive Weed Control
During National Invasive Species Awareness Week (February 27 – March 4, 2012), the District’s Environmental Scientist, Beau Wilsey, collaborated with UF IFAS Extension staff on the presentation “Local Invasive Plants: ID and Control.” The presentation was given at the Fort White Public Library on February 28. Other presenters were extension agents Derek Barber (Columbia County) and Barton Wilder (Alachua County).

Timber Sales
Status of timber sales currently underway is shown below:

<td>100%</td>
</tr>
</tbody>
</table>

The Ellaville Tract #13 Timber Sale was completed February 22, 2012, to the satisfaction of the Twin Rivers State Forest (TRSF) and District staff. This clearcut of 110 acres at TRSF was conducted by Suwannee Lumber Company. Roughly 7,900 tons of timber products were harvested for a sum of $140,312 which was paid in full prior to harvest activities. In a letter to the District, TRSF staff indicated Suwannee Lumber Company was professional and conscientious in their work performance.

Contractors conducting prescribed burns on Suwannee River Water Management District (District) lands this year include: Wildland Fire Services (WFS) and B&B Dugger, Inc., (B&BD). Also included are the acres Florida Forest Service burns on Twin Rivers State Forest (FFS TRSF). Florida Forest Service (FFS COOP) will
also provide a crew to burn acres on District tracts and Twin Rivers State Forest.

Burn Managers have started to conduct growing season burns over the past reporting period. Parts of the District have also received good amounts of rainfall which has helped relieve dry conditions and has provided a window of opportunity to burn more acres. Managers will continue looking for these opportunities as we continue through the growing season.

The Boggy Bennett and the L.A. Bennett wildfires in Mallory Swamp are still considered active by the Florida Forest Service (FFS). They are continuing to monitor these fires as needed. Even with the recent rains, organic (duff) soils continue to smolder and must be monitored to prevent these fires from re-igniting. When FFS officially declares these fires to be extinguished, fireline rehabilitation work can begin.

Meteorologists are forecasting La Niña conditions to continue into spring. This may continue to cause higher than normal temperatures and decreased precipitation. In turn, these conditions may continue to inhibit prescribed burning efforts until significant rainfall is received. A complete Florida Forest Service Fire Weather Outlook can be found online at [www.floridaforestservice.com/fire_weather/forecast/seasonal_forecast.html](http://www.floridaforestservice.com/fire_weather/forecast/seasonal_forecast.html).

**FACILITY MANAGEMENT**

Approximately 200 miles of District boundaries are scheduled for posting and
marking this fiscal year. At present about 86.5 miles of boundary line painting and posting has been completed. A large portion of the project will be conducted after the hunting seasons are over by posting and painting tracts to be added into wildlife management areas next year.

Boundary marking completed this month is shown below:

<table>
<thead>
<tr>
<th>Tract</th>
<th>Distance</th>
</tr>
</thead>
<tbody>
<tr>
<td>129 Tract</td>
<td>1.8 miles</td>
</tr>
<tr>
<td>Falmouth Tract</td>
<td>4.5 miles</td>
</tr>
<tr>
<td>Santa Fe River Ranch Tract</td>
<td>5.3 miles</td>
</tr>
</tbody>
</table>

District staff and contractors are working on the following road improvements:

<table>
<thead>
<tr>
<th>Road</th>
<th>Status Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Little Shoals</td>
<td>0.37 miles of road repairs are complete.</td>
</tr>
<tr>
<td>Gar Pond</td>
<td>0.52 miles of road repairs are complete.</td>
</tr>
<tr>
<td>Swift Creek</td>
<td>0.12 miles of road repairs are complete.</td>
</tr>
<tr>
<td>Holton Creek</td>
<td>Through a partnership with FWC, in which FWC is supplying the materials, 0.15 miles of road issues are being repaired. This project is approximately 25% complete. Left over materials will be used to perform minor repairs along the “spine road” (road numbers 16-2 and 16-4) which is roughly 3.5 miles long.</td>
</tr>
</tbody>
</table>

PUBLIC RECREATION SERVICES

A total of 39 special use authorizations (SUA) were issued to individuals or groups in February: 35 recreation and 4 temporary ingress and egress.

Three commercial special use authorizations were issued. The University of Florida, School of Forest Resources was issued a SUA to use the Santa Fe River Ranch Tract as a field site for students to use their skill to develop management plans for the tract. Two SUAs were issued to kayak liversies—Kayak Cedar Keys and Wild Florida Adventures—to access the proposed kayak launch site on the Lukens Tract near Cedar Key.

District staff met with Columbia County staff for the annual Falling Creek Falls Park management meeting on February 9. A review of the park was conducted and it was found to be well managed with no issues. No progress has been made toward identifying those responsible for burning the tobacco barn.

District has been assisting four Boy Scouts with Eagle Scout Projects on the Holton Creek Tract this spring. The first project completed was with Seth Noyes of Boy Scout Troop 597. His project was to clear a 1.5 mile section of trail beside road 16-8. The other projects will consist of installing markings to identify loop trails.

MEMORANDUM

TO: Governing Board
FROM: Brian Kauffman, Senior Professional Engineer
DATE: March 22, 2012
RE: Water Resource Projects Program Activity Report

Edwards Road Bottomlands Wetlands Restoration Project, Bradford County
The agreement with the City of Starke was discussed during the city commission meeting on February 7, 2011. The commission requested additional information which is being prepared by staff and District attorney. Requested additional information was received from consultant on March 6, 2012, and it is being reviewed by staff. District attorney is adding language to the Starke agreement. The District plans to meet with City representatives in late March to discuss the requested information and agreement changes.

In addition, the District has received the appraisal for the back 14 acres of the KOA property. District staff is currently reviewing the appraisal.

Federal Emergency Management Agency (FEMA) Map Modernization and Risk MAP
Levy County: The appeals and protests resolutions will be delivered to the communities after FEMA’s review is complete.

Fiscal Year 2009 projects: The appeal period for the Live Oak Detailed Study cannot begin until the Federal Register publishes the BFE notices. Legal Notices will also be posted twice in the local newspaper. The studies in Dixie, Gilchrist and Lafayette county are all progressing towards preliminary map production.

Fiscal Year 2010 projects: District staff is in the process of amending contracts with Atkins, AMEC, and AECOM to complete the Mapping Activity Statement that has been developed for the Lower Suwannee watershed.

Fiscal Year 2011 projects: District staff is in the process of amending contracts with Atkins and AMEC to begin the Upper Suwannee and Santa Fe rivers Risk Map Studies.

Lake Sampson Water Control Structure
Staff is reviewing the modeling results submitted by URS to determine if the new structure will increase the base flood elevation. A scope of work is being prepared to contract with AMEC to design the structure to meet permitting and FEMA requirements. A communications plan has been drafted in order to have cooperation and approval of the project’s stakeholders.
Algal Turf Scrubber Pilot System at Boston Farm
IFAS submitted their final report on March 1, 2012. The algal turf scrubber system on the Santa Fe River at Boston Farm has been successfully demobilized. District staff conducted a final inspection at the Boston Farm site on February 29, 2012. Hydromentia submitted a Phase I proposal to the District to install an algal turf scrubber system on the Suwannee River. The District is evaluating the proposal.

Water Quality Compensatory Treatment
FDOT provided the District with $46,640 for water quality compensatory treatment for the US 98 Bridge Replacement project over the Aucilla River as part of ERP10-0057. District staff has implemented water quality improvements at two of the District’s river access locations on the Mt. Gilead Tract and one location at the Cabbage Grove tract. Restoration included the regrading and stabilization at these locations to prevent further erosion into the river and to relocate parking away from the river bank. The projects also included vegetative improvements at each site. The work is complete and will be monitored by staff.

Bell Springs Restoration
The Florida Fish & Wildlife Conservation Commission (FWC) has applied for grant money to restore the Bell Springs’ spring run on District land in Columbia County. In late March 2012, FWC will hear if the grant was approved for this project. FWC has requested project management assistance from the District. A meeting was held on February 8, 2012, with the original owner to discuss the history of the spring.

Home Depot/Cannon Creek Wetland Mitigation
District staff met with Columbia County on February 28, 2012, to discuss mitigation for the Home Depot and Cannon Creek sites in Lake City. District staff has prepared a draft agreement with Columbia County to outline the responsibilities of each entity as it relates to the mitigation of wetlands at these sites. A meeting was held with the Army Corps of Engineers (ACOE) to discuss the mitigation project on January 26, 2012, and a follow up meeting is scheduled for March 14, 2012. The ACOE agreed to provide their evaluation of the wetland impacts to the District by this meeting. District staff is exploring mitigation alternatives within the Cannon Creek Basin and the Santa Fe River watershed.

Water Conservation Program
District staff hosted a meeting for all School Superintendents on February 2, 2012, to discuss a water conservation cost share program for area schools. Representatives from Columbia, Gilchrist, Hamilton, and Suwannee County schools attended. The Florida Rural Water Association (FWRA) and District staff outlined details of the program. Currently, Columbia, Alachua, Gilchrist and Suwannee counties have agreed to participate in the program. FWRA will provide an audit of the school’s water use and provide water conservation recommendations. The schools will be responsible for implementing the
conservation measures and the district will provide cost share funding for materials up to $10,000. The audits are scheduled for March and April so the schools can implement the projects during the summer.

The District has also asked the FRWA to help evaluate water conservation opportunities with ten municipal water utilities and one county government (Gilchrist). The utilities were selected based on total water used and the largest per capita consumption. A contract has been executed with FRWA for the audit services.

District Headquarters Reuse Program
The District is in the process of connecting to the City of Live Oak’s reuse supply line. The city has installed a meter and staff is reviewing costs to disconnect our potable water source (well) and connect the reuse water into the existing irrigation system. This will remove the need for potable water in the irrigation system.

Big Bend Water Authority
In July 2011 the Governing Board agreed to provide $250,000 towards the cost of connecting existing homes and businesses to the new centralized wastewater system being designed for the town of Steinhatchee. The authority has obtained all other funding for the project and is now ready to formalize an agreement with the district. Staff has drafted an interlocal agreement for the project and it is currently being reviewed by the district’s attorney. Construction is scheduled to begin in July 2012.

Minimum Flows and Levels Survey Contract
On February 27, the Governing Board approved staff’s recommendation to contract with AMEC to survey the upper Suwannee River for a cost not to exceed $96,359. Dr. George Cole and staff met with the surveyors on March 8 to review their proposed survey procedures and standards for this project. A contract was executed on March 9, 2012, and the survey crews began work on March 12, 2012. According to the contract the survey will be completed by May 15, 2012.

Please feel free to contact staff prior to the April 10, 2012, Governing Board meeting if you would like further information.

<td>20 days to contact District. 3/22/11: Compliance Agreement being prepared &amp; RAI sent. Mr. Roberts contacted the District on 3/22/11. Compliance Agreement received by Mr. Roberts on 3/21/11. 4/5/11; meeting at District. Executed the compliance agreement and paid penalty. 4/11/11; mailed executed Compliance Agreement. Conducted site inspection on 4/15/11, fill was removed and regraded but large mounds of cleared vegetation must still be removed from the floodway. RAI responses received on 4/21/11. Permit issued 4/28/11. Owner has requested a burn permit to burn vegetative piles. Has not been able to burn because of drought conditions. 7/19/11; Respondent came in and reported that he will work on burning the vegetative debris. Site visit 8/18/11 &amp; 9/1/11. 9/7/11; letter sent. 45 days to remove vegetation debris. 10/7/11; Mr. Roberts informed District that due to health conditions, he has stopped debris removal. As of 1/17/12, Mr. Roberts has been given clearance to do some light work activity. He has been slowly working on removing the piles. Staff will keep monitoring his progress and reinspect by 4/15/12.</td>
